ABOUT CHILLI IQ

connecting leaders + ideas

We are a leading creator of conferences and summits who aim to bring together great minds with avid learners amongst the thought-inspiring atmosphere of leading venues.

Chilli IQ has many years of collective experience in the area of creating and developing innovative conferences and summits for the changing business environment. This is not though what differentiates us from the crowd, what makes us unique is our modus operandi. We value quality and strive to ensure that every aspect of our events reflects this – from the choice of speakers, the venue and the genuine attention to detail.

Our main objective is to lead the field in the area of knowledge delivery and as this is a fluid process we are constantly seeking new avenues and evolving to make sure we never just settle. We ensure that all who partake in the Chilli IQ conference experience – whether it be as a delegate, a speaker, a sponsor or an endorsing association – maximise their investment and attain a higher level of understanding and awareness of the chosen business theme.

ABOUT THE EVENT : THEME

2030: THE FUTURE OF TECHNOLOGY & THE LEGAL INDUSTRY

**AI & Beyond ::
the latest on
where we are
and where we
are heading with
artificial
intelligence**

The rapid growth and widespread adoption of Artificial Intelligence have been truly remarkable. This technology is now quickly integrating into organisational systems, with an increasing number of law firms incorporating it into their daily operations.

- What does this mean for the future of legal services, the legal sector, and the workforce?
- What steps are necessary for successful integration, and what topics like ethics, accuracy, re-skilling, and other concerns still require in-depth discussion?

Some experts propose perceiving these technological disruptions as opportunities for evolution rather than causes for concern.

"The Future of Technology and the Legal Industry" serves as a sequel to last year's highly successful inaugural event, and it is a vital gathering for legal professionals.

This innovative event will bring together leading experts to explore this rapidly evolving field that is changing faster than we can keep pace with. Taking place in both Sydney and Melbourne, the event will offer a central hub for sharing knowledge and fostering networking opportunities.

The most successful organizations and professionals will be the ones that use GenAI to augment, not fully replace, what professionals do.

EXPLORING THE USE OF AI IN ONLINE DISPUTE RESOLUTION

The development of technology has led to the evolution of Alternative Dispute Resolution into Online Dispute Resolution (ODR). The advancements in technology, specifically Artificial Intelligence (AI), has the potential to enhance the efficiency and fairness of the dispute resolution process.

Therefore, in this presentation, Dr Abedi will conduct a careful review of the development of AI in ODR, describing its benefits and challenges. Additionally, she will provide recommendations on how to best proceed with the use of AI for the future of ODR.

DR FAHIMEH ABEDI | RESEARCH FELLOW,

MACHINES BEHAVING BADLY

Generative AI tools like Stable Diffusion and ChatGPT have caught the public attention. But what new issues does AI bring to the table?

What are the opportunities?

And what are the new ethical challenges?

There are many issues to address from fairness to facial recognition, and from phishing to intellectual property.
